

Why is Kyrgyzstan urging people to reduce electricity use?

Kyrgyzstan urged residents to use less electricity on Friday, warning that its power grid is struggling under the weight of record-high winter demand. The energy ministry warned that unless people reduced electricity use there would be power supply "interruptions", without elaborating, and that hydropower production was at risk.

What is the BrightNight Ragland project?

The BrightNight Ragland project is a currently under development solar power project in McCracken County, Kentucky. It will provide 125-megawatts of clean renewable solar power to five major organizations in LG&E's service territories. Additionally, the project will generate significant economic value through tax revenue and job creation.

Why is Kyrgyzstan using more electricity than normal?

Due to the arrival of winter and a drop in temperatures, the population is using more electricity than normal," Kyrgyzstan's energy ministry said in a statement. The landlocked, mountainous country gets some 90 percent of its electricity from hydropower, making it especially vulnerable to water shortages.

Where does Kyrgyzstan get its electricity from?

The landlocked, mountainous country gets some 90 percent of its electricity from hydropower, making it especially vulnerable to water shortages. The largest hydropower plant in Kyrgyzstan is in the central city of Toktogul.

Where is the largest hydropower plant in Kyrgyzstan?

The largest hydropower plant in Kyrgyzstan is in the central city of Toktogul. That facility alone provides some 40 percent of electricity in the country.
