The latitude is the position relative to the equator, specifying the north-south position. The longitude specifies the east-west position measured from a reference meridian (usually the Greenwich Prime Meridian). The latitude and longitude of Cabo Verde have been calculated based on the geodetic datum WGS84. Map of Cabo Verde with coordinates

In the last 5 years Cape Verde has undertaken an ambitious intervention on the clarifications on the boundaries and property rights given that, the country has been faced so far with no conclusive source of information about land property. At least 2 different land records systems each contain partial information about only a limited share of the country's land parcels.
