How much solar power will Lebanon have in 2022?

Over 650 megawatts (MW) were installed in 2022 alone,says El-Khoury,bringing Lebanon's total solar capacity to 870MW, according to his figures. "Installed capacity should reach 1,000MW in June ," he says. He estimates that the installed capacity of diesel generators, meanwhile, likely amounts to 1,000-1,500MW.

Does Lebanon need solar power?

Lebanon has a target to source 30% of its electricity from renewables by 2030. However, some argue that LCEC and Lebanon's government have played little role in the rollout of solar in the country.

Are rooftop solar panels a good idea for Lebanon?

Rooftop solar panels are offering the promise of a more normal way of living in Lebanonamidst an unsteady electricity supply - for those who can afford it.

The Global Solar Atlas provides a summary of solar power potential and solar resources globally. It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource database.
