

Does Lebanon have solar power?

Myriam Boulos--Magnum Photos for TIME Lebanon went from generating zero solar power in 2010 to having 90 megawatts of solar capacity in 2020. But the major surge happened when a further 100 megawatts were added in 2021 and 500 megawatts in 2022, according to the LCEC's Khoury.

Where are solar panels located in Lebanon?

Atop several campus buildings at Sagesse University in Furn El-Chebbak, a suburb southeast of Beirut, row upon row of solar panels gleam under the bright afternoon sun. The Catholic university, home to some 3,500 students, is one of the many organizations in Lebanon that have turned to solar power.

How much solar power will Lebanon have in 2022?

Over 650 megawatts (MW) were installed in 2022 alone, says El-Khoury, bringing Lebanon's total solar capacity to 870 MW, according to his figures. "Installed capacity should reach 1,000 MW in June," he says. He estimates that the installed capacity of diesel generators, meanwhile, likely amounts to 1,000-1,500 MW.

How many solar companies are there in Lebanon?

ME Green was one of the early solar-power companies in Lebanon, but the sector has ballooned, from around 150 registered businesses in 2020 to more than 800 today, according to the LCEC's Khoury. These companies work on everything from small household systems--which start at \$2,000 to \$3,500--to projects involving hundreds of panels or more.

Are rooftop solar panels a good idea for Lebanon?

Rooftop solar panels are offering the promise of a more normal way of living in Lebanon amidst an unsteady electricity supply - for those who can afford it.

Are Lebanon's solar companies paying a lot for fuel?

We are also paying a lot for fuel." ME Green was one of the early solar-power companies in Lebanon, but the sector has ballooned, from around 150 registered businesses in 2020 to more than 800 today, according to the LCEC's Khoury.

The good news is that the future of solar energy in Lebanon is bright. The country has abundant sunshine, and the cost of solar panels has been steadily decreasing. In addition, the government is providing incentives for businesses and homeowners to install solar power systems.
