libbi Firmware Release Notes

The MyEnergi Libbi is an intelligent battery storage system for residential applications. The system combines: 5.0kW Inverter 5kWh Battery Module Controller; The Libbi lets you store your self-generated energy to use when you need it most.

What is Myenergi Libbi? Myenergi Libbi goes beyond just storing excess solar energy. It's a smart home battery system that acts like your personal energy assistant, learning your habits and optimising

The Myenergi libbi stores excess electricity for when you need it most. It allows you to capture as much surplus solar electricity as possible, whilst integrating with existing myenergi devices. libbi is modular by design, meaning each module can store up to 5kWh of electricity, so combining 4 of them together would provide up to 20kWh of storage.

With a nominal capacity of 5.12kWh, the Libbi battery pack delivers reliable performance for your energy storage needs. It operates within a wide voltage range and can handle maximum charge/discharge currents of 50A/80A, ensuring efficient energy transfer.

The MyEnergi Libbi battery system from myenergy is a compact and efficient energy storage solution designed for residential use. It seamlessly integrates with solar power systems, allowing users to store excess energy for later use.

libbi is a modular battery system that adapts to your needs. We created libbi to store your electricity, to use it when you need it most. It allows you to capture as much surplus solar electricity as possible, whilst integrating with your existing myenergi devices.

It's a year ago this week since our libbi system was installed. It has been a game changer for our ability to shift our energy use into the Economy 7 period. We are in an all-electric house (ASHP and 2 x EVs) and we could do with another 10 kWh of batteries to max out our system now.

The MyEnergi Libbi is an intelligent battery storage system for residential applications. The system combines: 5.0kW Inverter 5kWh Battery Module Controller; The Libbi lets you store your self-generated energy to use when ...
