

What is solar photovoltaic bracket?

Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum alloy, carbon steel and stainless steel. The related products of the solar support system are made of carbon steel and stainless steel.

What types of solar photovoltaic brackets are used in China?

At present, the solar photovoltaic brackets commonly used in China are divided into three types: concrete brackets, steel brackets and aluminum alloy brackets. Concrete supports are mainly used in large-scale photovoltaic power stations. Because of their self-weight, they can only be placed in the field and in areas with good foundations.

What types of PV mounting systems are available?

Their product portfolio includes tracking PV mounting systems, adjustable PV mounting systems, ground-fixed PV mounting systems, building-attached PV mounting systems, photovoltaic building structures, flexible PV mounting systems, PV intelligent cleaning solutions, and building support and suspension systems.

What materials are used in solar support system?

The general materials are aluminum alloy, carbon steel and stainless steel. The related products of the solar support system are made of carbon steel and stainless steel. The surface of the carbon steel is hot-dip galvanized and will not rust for 30 years in outdoor use.

What makes a good bracket system?

(6) The cost should be reasonable. A high-quality bracket system must use computer simulation software for extreme weather conditions to verify its design, and conduct strict mechanical performance tests, such as tensile strength and yield strength, to ensure the durability of the product.

What are the technical difficulties in assembling section steel brackets?

In short, there are many technical difficulties in the production process of the assembled section steel bracket, which requires metallurgical engineering and technical personnel to overcome technical barriers and further reduce its use cost.

Hebei Qierjie New Energy Technology Co., Ltd.: We're professional seismic bracing, photovoltaic support, aluminum accessory, standard clevis hanger, hexagon coupling nut manufacturers ...

Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum ...

Against the backdrop of rapid development in the solar energy industry, ground brackets, as an important component of solar systems, play a crucial role. This article will introduce the types ...
