

Can solar power help Eswatini achieve its electrification goals?

Although Eswatini's electrification rates are relatively high, they are still a long way off 100% (the country's target for 2022). Solar power is the most viable solution for Eswatini to help meet its electrification goals and save costs down the line.

What is driving Eswatini's growth?

The biggest driver of growth in Eswatini's PV market is private PV projects. In 2022, Eswatini partnered with Frazium Energy to commission a new 100MW solar storage project with 75,000 PV panels, hoping to produce more than 100 million kWh of electricity a year and generate at least 200 jobs.

Who is SegenSolar & what is it doing in Eswatini?

SegenSolar is a leading African independent power producer that is overseeing a ground-mounted project in Eswatini. They are keen to foster the development of additional small and large-scale PV installations across Eswatini. Homeowners can get in touch for more details about their work.

The project involves turn-key EPC of a 1.5MW grid-tie solar power plant to power pumps and other facilities on a sugar plantation. Location: Eswatini. Customer: Sugarcane farm. Technical: 1.5MW (1MW + 485KW) ground mounted (fixed) solar panels, string inverters, monitoring, weather station, fence and other balance of system equipment.

The mega solar-storage project, which will be located at the Edwaleni Power Station in the central town of Matsapha, will have an initial capacity of 100 MW and supply more than 100 million kWh...

Frazium Energy has signed a contract with the Eswatini government to develop a solar PV and storage project. The first phase is expected to consist of a 25-30MW solar PV component with a 100MW lithium-ion battery, supplying about 100GWh/yr at a cost of \$115m, according to chief executive Robert Frazer.

Frazium Energy - part of the Australian-German Frazer Solar group - has signed a 40-year contract with the government of the Southern African kingdom of Eswatini (formerly known as Swaziland) for a EUR100 million (\$115 million) solar battery project. The mega solar-storage project, which will be located at the Edwaleni Power Station in the ...

Frazium Energy has entered into a EUR100 million contract with the government of the Southern African kingdom of Eswatini for a solar battery project. The contract has been entered for a period of 40 years. With an initial capacity of 100 MW, the project will be located at the Edwaleni Power Station in the town of Matsapha.

Frazer Solar is developing a large-scale solar-storage project for IPP investor, owner and operator Frazium Energy. Phase 1 of the development involves solar PV coupled with battery storage to provide 200 MWH of dispatchable baseload electricity per day.

On behalf of Business Eswatini, it is a privilege to introduce this insightful market report on embedded solar generation. As the world transitions toward cleaner, more sustainable energy solutions, the role of solar power is at the forefront of innovation, offering exciting new avenues for growth and development.
