

In June 2020, The Czech Republic's dominant power company, CEZ, proposed the construction of a factory to produce lithium batteries for electric cars in North Bohemia. In July 2021, the Czech Ministry of Industry and CEZ signed an agreement over plans to attract a ...

The Czech Ministry of Industry and Trade is betting on the Plzen region, in the Western part of the country, as the best location to open Czechia's first gigafactory producing batteries for electric vehicles.

Fiala sees the mining of lithium, which is used to produce car batteries, as a strategic raw material and essential for the restart of Czechia. According to Industry and Trade Minister Jozef S&#237;kela, negotiations with three investors to build a car battery factory in the Czech Republic are at an advanced stage.

CEZ plans to build a Czech Gigafactory to manufacture lithium batteries in North Bohemia. The plant will produce batteries for electric vehicles using lithium from the Czech and German mines. The project will be one of the most significant investments of its ...

The Czech Republic has already concluded a Memorandum of Cooperation with the German state of Saxony about possible cooperation on lithium extraction. On the Czech side, extraction will be managed by the majority state-owned electricity producer CEZ. Almost a million lithium-ion batteries per year

C&#237;novec is now fully funded up to the decision to commence construction, paving the way for the project to become the first EU producer of battery-grade lithium from a local mine. Construction is expected to take two years.

Czechia is home to the largest lithium resource in Europe (nearby C&#237;novec in the Krusn&#233;hory Mountains). It also has manganese deposits (in the Pardubice region). The production of batteries will be able to sustain an entire value chain--from the input of raw materials and the production of batteries, to their second-life use and recycling.

CEZ plans to build a Czech Gigafactory to manufacture lithium batteries in North Bohemia. The plant will produce batteries for electric vehicles using lithium from the Czech and German mines. The project will be one of ...

Mining for lithium could start in the Czech Republic in two years, exploiting Europe's largest resource of the metal that is used in batteries for electric vehicles and home power storage. The deposits lie around Cinovec, a village with a tradition of mining since the 14th century and situated near the border with Germany, the [...]

Cinovec is now fully funded up to the decision to commence construction, paving the way for the project to become the first EU producer of battery-grade lithium from a local mine. Construction is expected to take two ...

GWL is one of the largest lithium phosphate batteries (LFP) distributors in Europe. It is a Czech company, with Czech capital, representing all three most technologically advanced LFP battery manufacturers in the World (Winston Thundersky, CALB and Sinopoly).
