

Who provides electricity in the Maldives?

The provision of electricity in the Maldives is largely handled by the State Electric Company Limited(STELCO),the main state-owned utility company. STELCO operates power plants across the country and is responsible for the generation,distribution,and supply of electricity.

Will Stelco build the largest powerhouse in the Maldives?

State Electric Company (STELCO) announces the utility provider's plans to build the largest powerhouse in the Maldives in the upcoming year. The powerhouse unit will have the capacity to produce 100-megavoltsof power.

Does Maldives have an electrical power system?

All power systems and electrical installations in Maldives must comply with the regulations of the Maldives Energy Authority. No interconnection between the islands exists as of today. Both public utility companies (FENAKA and STELCO) are owned by the Ministry of Finance.

Can solar power be used in the Maldives?

While diesel generators are the primary source of electricity,the Maldives is also exploring renewable energy options. Given the abundance of sunlight the islands receive,solar power is a promising alternative.

Who is allowed to install power systems in Maldives?

In Maldives,only licensed engineers and consultantsare allowed to carry out works related to power systems,including design,installation,and commissioning.

How does water supply work in the Maldives?

The lack of freshwater sources in the Maldives makes water provision a significant challenge. Desalination plants,which convert seawater into freshwater,are a common solution. These plants use a process called reverse osmosis to remove the salt and other impurities from the seawater,making it safe for consumption and use.
