

Energy storage updatel | Marshall Islands . In late 2021, Photon Energy N.V. secured 1,200 hectares of land in South Australia to develop one of the world's largest solar energy storage project. Photon will develop a solar generation capacity of 300 MW using RayGen's solar technology with a grid connection capacity of 150 MW.

Recently, SINOSOAR successfully attained a Solar on-Grid system project in the Marshall Islands, particularly for a Major Supermarket in Majuro. The project aims to build a roof mounted PV system on top of the Supermarket After the completion of this project, it will largely reduce the Electricity Bills for the Supermarket.

Seasonal solar PV output for Latitude: 7.091, Longitude: 171.3765 (Majuro, Marshall Islands), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API:

RMI receives high levels of solar irradiation (GHI) of 5.4 kWh/m²/day and specific yield of 4.2 kWh/kWp/day, indicating a strong technical feasibility for solar in the country. 10 RMI, with distribution and installations of more than 3,100 Solar Home Systems in the rural communities, has increased its rate of extending clean energy to 100%.8
