

The intention of our solar projects is to provide a usable, sustainable, and cost effective supply of electricity for specific uses. By integrating the customer into the lifestyle of using a solar power system, and providing training and technical support, we find the users are much more likely to properly maintain their systems for the long-term.

This group of islands is favorably located to supply its energy needs from the fierce tropical sun. The government of the Marshall Islands has implemented extensive solar energy projects to electrify homes, workplaces and other facilities.

Over the past five years, Island Eco has been mostly project-based, and has moved away from the commercial model. In fact, we are currently expanding our project based team for our most recent successful grant projects, focused on electrification and refrigeration to alleviate hardships and impacts from hazards in the Marshall Islands.
