

Is Iraq a good country for solar energy?

Iraq holds abundant oil and gas resources and has strong solar PV potential. Its production to 2030 is set to be the third largest contributor to global oil supply. By the same year, the government expects that renewable capacity will amount for 5% of the country's total system capacity.

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues, domestic reform is necessary. This past July, Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project, a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

Why is energy important in Iraq?

Energy in Iraq plays a crucial role in both the national economy and the global energy markets due to the country's vast oil reserves and significant status within the Organization of the Petroleum Exporting Countries (OPEC). Iraq holds abundant oil and gas resources and has strong solar PV potential.

What is Iraq's refining capacity?

Iraq's total operating refining capacity is about 1.2 million b/d.<sup>27</sup> The Iraqi government plans to reduce petroleum product imports by rehabilitating the refining sector and building new refineries, but the government has struggled in its efforts to attract the foreign investment needed in the downstream sector.

What type of energy is used in Iraq?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Iraq: How much of the country's energy comes from nuclear power?

What does the TotalEnergies deal mean for Iraq?

The TotalEnergies deal aims to help Iraq harness the natural gas emitted by its oil wells, achieve a more balanced energy portfolio, and address some of its domestic electricity shortages. It would also be significantly cheaper for Iraq to harness its own gas rather than to continue with its current agreement with Iran.

Iraq holds the 12th largest natural gas reserves in the world, estimated at 131 trillion cubic feet (Tcf) at the end of 2022, predominantly located in large oil fields in the south and mostly associated with oil production. Despite these substantial reserves, Iraq faces regulatory, investment, and infrastructure challenges, which have kept natural gas production largely unchanged since 2016. The majority of Iraq's natural gas, about two-thirds, is produced as a by...

Iraq holds abundant oil and gas resources and has strong solar PV potential. Its production to 2030 is set to be

third largest contributor to global oil supply. By the same year, the government expects that renewable capacity will amount for 5% of the cou

Iraq: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.
