

The Ultimate Energy Cube is a machine added by Mekanism. It is the highest tier of energy cubes. It can store and output more energy than the Basic, Advanced and Elite Energy Cubes. Furthermore the Cube can be used as a charging station for items.

The Induction Matrix can hold a ludicrous amount of energy. It is best used as an endgame catch-all solution for a battery, especially when filling up capacity may be disastrous (for example, if a turbine can not fill up or the player's Fission Reactor will melt down).

Mekanism has the Induction Cell multiblock. It seems like it's exactly what you're looking for. It does have a good bit of microcrafting, but it can hold several trillions of FE, if I'm understanding the measurement in the GUI correctly and transfer several million(?) FE/T.

The Advanced Energy Cube is a machine added by Mekanism. It is the second tier of energy cubes. It can store and output more energy than the Basic Energy Cube. Furthermore the Cube can be used as a charging station for items. The next tier up is the Elite Energy Cube.

Mekanism multiblock induction matrix until you can build the last stage of the draconic core. One Single induction cell of the last tier can store 204.000.000.000 RF and the max size is a 18x18x18 The earliest cell is pretty easy to make and already stores 400.000.000 RF.

A multiblock energy tank capable of storing larger amounts of energy than would be feasible to store using energy cubes. @aidancbrady, I understand you've made something of a start on this, I'll leave it for you to do when you have the time.
