

Will Chile achieve net-zero emissions by 2050?

Last December, Chile's centre-right government published the country's first energy transition strategy, which provided targets for achieving net-zero emissions by 2050, including accelerating solar, wind and geothermal energy across the country.

How does metworld operate in Ivory Coast?

Metworld operates in Ivory Coast media spectrum through its subsidiary, CDML. The company publishes *PepeSoupe*, a French language newspaper covering the length and breadth of the country. Metworld operates in the pharmaceutical and healthcare sector through its associate company Magbro.

Where does Chile get its energy from?

This page is part of Global Energy Monitor's Latin America Energy Portal. Chile derives roughly two thirds of its total energy supply from fossil fuels, with oil, coal and natural gas all playing key roles; biofuels, together with smaller amounts of hydro, wind and solar, account for the remainder.

METLEN Energy & Metals, inaugurated its second own project in Chile. Doña Antonia solar park, with an investment of US\$65 million dollars and with an installed capacity of 90 MW will provide clean 100% renewable energy for the green development of the country.

Chile has set an ambitious goal of converting 70% of its total energy consumption to renewables by 2030 and pledged to become carbon neutral by 2050. The country's energy transition strategy has evolved in recent years due to a combination of broad-based political support and innovative green technologies.

Chile: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key ...

Chile has some of the highest levels of solar radiation on earth, making it a prime candidate for photovoltaic energy development, and the Magallanes region in southern Chile is being touted as a prime site for wind-powered green hydrogen projects.
