

Does Mexico have a strong energy sector?

Mexico has an expanding energy sector, prepared to meet the demand of its growing population. Historically reliant on fossil fuels and a leading oil producer, Mexico's electricity generation is based on imported natural gas, from which this Latin American country has one of the largest power generating capacities worldwide.

What is Mexico's national strategy for the electricity sector?

Mexico's National Strategy for the Electric Sector, while comprehensive in its approach to energy production and distribution, notably omits crucial elements for innovation and new technologies, such as a dedicated digital strategy for the electricity sector.

Does Mexico have 43% of its energy come from non-contaminating sources?

Mexico is committed to having 43% of the energy it generates come from non-contaminating sources by 2030. (AP Photo/Felix Marquez, File) MEXICO CITY (AP) -- Mexico's taking control of its oil sector from U.S. and British companies is taught in schools and celebrated every year.

Why should you invest in energy supply management in Mexico?

Open and competitive electricity and natural gas markets in Mexico offer an opportunity for savvy energy buyers using smart energy supply management strategies to save money. That takes a partner with specialized expertise. Our experts will assess your biggest opportunities and develop a custom plan for your facilities.

Can Mexico increase energy independence?

As noted in previous work from the Center for U.S. and Mexico, Mexico's potential for increasing energy independence, reducing emissions, and generating employment is significant.

How can energy buyers save money in Mexico?

Open and competitive electricity and natural gas markets in Mexico offer an opportunity for savvy energy buyers using smart energy supply management strategies to save money. That takes a partner with specialized expertise. Simplify Renewable Energy Purchases to Maximize Their Value

What hurdles need to be overcome for Mexico to unlock its potential for solar energy? The potential for solar power generation is huge. Radiation in Mexico is rated as among the best in the world. When Prana Power started in 2017, there was clarity in the renewables space because there were set targets, both locally and internationally.
