Microgrid renewable energy Republic

Goals & Objectives: This masters project represents the first step in establishing a long term relationship between Kivu Green Energy and SWB at SNRE. The two organizations have identified the following goals for their relationship: 1. Increase the use of renewable energy in the company's portfolio 2.

Energy storage system: Energy storage system (ESS) performs multiple functions in MGs such as ensuring power quality, peak load shaving, frequency regulation, smoothing the output of renewable energy sources (RESs) and providing backup power for the system [59]. ESS also plays a crucial role in MG cost optimization [58].
