

Does Moldova have a strong energy infrastructure against cyber and hybrid threats?

Experts from NATO and the Republic of Moldova have been working together to enhance the resilience of the country's critical energy infrastructure against cyber and hybrid threats. Exercise Coherent Resilience 2024 Moldova (CORE-24 M) was held in Chisinau between 12-14 March 2024.

Where does Moldova get its energy from?

The country's main energy supplier is the Moldavskaya GRES power plant, located in Transnistria and owned by the Russian state-owned company Inter RAO. The power plant is fuelled by gas, supplied to Transnistria from Russia under the aforementioned contract with Moldova. It generates about 70-80% of the power consumed by the right-bank.

How has Moldova restructured its electricity distribution network?

As part of the reforms, Moldova restructured and partially privatized its electricity distribution network, including Premier Energy, a private company that controls 70 percent of the country's electric distribution grid.

Does Moldova have a new energy policy?

Moldova has committed to implement reforms embedded within the European Union's Third Energy Package, a suite of legislation adopted in 2009 aimed at creating integrated and competitive energy markets for natural gas and electricity.

Does Moldova have a synchronous electricity system?

While there are transmission lines connecting Moldova's electricity to Romania, the grid cannot operate synchronously with Romania's electricity system, which is part of ENTSO-E's Continental Europe Synchronous Area and has stricter regulations for the technical operation of its network.

How many hydropower plants does Moldova have?

Moldova has one hydropower plant, the Costesti Hydropower Plant. Moldavskaya GRES (MGRES) in the separatist region of Transnistria supplies the vast majority of the remaining 80 percent of electricity. Moldova also imports electricity from Ukraine and Romania.

Premier Energy ÎCS, which is part of the international conglomerate EMMA Capital Group controlled by Czech businessman Jirí Smejck, will develop renewable energy assets in Moldova, IPN reports with reference to Agerpres, which quotes a press release of the Group. For this purpose, investments will be made from the sale of Premier Energy PLC shares on ...

As part of the Energy Community, Moldova had a binding 10% contribution target for renewable sources (from either electricity, biofuels or hydrogen) in its transport sector by 2020. This target was not met.

Given Moldova's struggle to reform the country and its long history of oligarchic capture, the most serious threats to its successful transforma-tion and integration into the EU are currently ...

We shall be more accessible and more interested in clean energy," said Jose Luis Gomez Pascual. In April 2019, the Naturgy Energy Group signed sale - purchase agreement for electricity distribution and supply companies in Moldova, Red Union Fenosa and Gas Natural Fenosa Energy Supply with the international group Duet Private Equity Limited.

Since then, Moldova has faced multiple crises including errant missiles landing on its territory, a severe energy crisis after Moscow dramatically reduced gas supplies, rampant inflation and recurring anti-government protests by pro-Russia parties. A pro-Western government has been in power since 2021, a year after Sandu won the presidency, and a parliamentary ...

Moldova's About-Face. When Russia invaded Ukraine, neighboring Moldova's plans to strengthen its military were put into hyperdrive. Ukraine, the second largest country in Europe by territory, and its tiny neighbor have more in common than initially meets the eye: both are ex-Soviet states trying to leave Russia's orbit, both are turning to the West for military help, and both have ...

Today, the EU has reiterated its support for Moldova and its energy sector at the third EU-Moldova High-Level Energy Dialogue, held in Vienna. The meeting was co-chaired by Commissioner for Energy, Kadri ...

The Republic of Moldova is importing almost 100% of fossil energy resources (gas, gasoline, diesel, LPG,...) and about 70% of its electricity demands. To transition towards a carbon ...
