

How can Mongolia manage energy demand & prevent power outages?

To manage the energy demand and prevent power outages, Mongolia's Energy Regulation Committee imported more energy from Russia and asked people to follow energy-saving practices. In 2024, energy experts and Mongolia's global partners are urging the Mongolian government to prioritize the energy sector.

Can Mongolia sustain its domestic electricity demand?

Mongolia has the potential to sustain its domestic electricity demand through renewable energy sources such as solar, wind, and hydro. It should also view exports of renewable energy into neighboring countries as an alternative source of economic security. Energy as Electricity

How can Mongolia improve its energy sector?

Mongolia's commitment to the Paris Agreement and the U.N. Climate and Clean Air Coalition 2030 are closely linked with Ulaanbaatar's pursuit of reinvigorating its energy sector. For these mega projects to be successful and fruitful, Mongolia must tackle corruption and strengthen the country's investor profile.

Does Mongolia have a good energy policy?

A failure to recognize the impact of mineral resources such as coal and copper on Mongolia's energy policy is deeply flawed and potentially dangerous. According to data from the Mongolian National Statistics Office, last year 86 percent of the country's exports were raw materials, including coal, copper concentrate, and gold.

Why is Mongolia struggling with energy shortages & power outages?

To many Mongolians, energy shortages and power outages are not new problems. However, this does not mean the country's 3.4 million people should be complacent with underdevelopment. The recent energy shortage also stresses Mongolia's extreme dependence on Russia's energy supply.

Is energy security a national security issue in Mongolia?

Mongolian policymakers, ministries, and the general public must understand that the energy security issue is not limited to electricity production and consumption; rather, almost every sector in Mongolia, from the economy to agriculture, is deeply intertwined with the energy situation, which makes it a national security priority.
