

Green Energy Systems in Mongolia

Mongolia's recent period of growth has relied primarily on mineral wealth and energy production to fuel the economy and forward national development. The Mongolian government is aware of this over-reliance and the problems it creates for sustainable economic growth and the country's environmental sustainability.

A planned battery energy storage system for Mongolia will be the largest of its type in the world and provide a blueprint for other developing countries to follow as they decarbonize their power systems. Mongolia's coal-dependent energy sector accounts for about two thirds of Mongolia's greenhouse gas emissions.

Another key area that Mongolia needs to start prioritizing for it to succeed in its just energy transition is to equip its workforce with skills needed in the emerging green transition through various capacity building and education programs.

By harnessing its rich renewable resources and implementing inclusive policies,Mongolia can secure a brighter,greener future for all its citizens. The UNDP remains committed to supporting Mongolia in this vital transition,ensuring that the shift to clean energy benefits everyone,leaving no one behind.

Global shift to Clean Energy. On International Day of Clean Energy, inaugurated on 26 January 2024, the world is reminded of our climate promise and the need for urgent action for a just and inclusive transition towards clean energy, a necessity for both people and planet.. At COP28, countries agreed to recognize the need for collective progress for transitioning away ...

According to the study "Green versus brown: Comparing the employment impacts of energy efficiency, renewable energy, and fossil fuels using an input-output model" each ONE million USD shifted from brown to green energy creates a net increase of FIVE jobs (Heidi Garrett-Peltier, 2017). Hence, GGGI Mongolia is digging deeper into Mongolia's ...

In 2016, XacBank was granted funding from the Green Climate Fund to implement an MSME business loan programme for greenhouse gas emissions reduction in Mongolia. BASE supported XacBank to identify business opportunities, and define a strategy aimed at motivating clients to invest in renewable energy and energy efficiency.

The report identifies a Just Energy Transition (JET) as a vital pathway for Mongolia to sustainably increase its human development to higher levels. It points that a fair shift towards clean energy can stimulate green economic growth, build resilience, and reduce emissions, while advancing health, education, social equity and gender equality.

partner countries, Mongolia has been contributing to the process of transitioning towards green economy and ensuring sustainable economic growth rate. The Government of Mongolia is taking a series of measures in regard to the development of green economy such as by improving macroeconomic research or T21 modeling.
