

Masen's Noor Midelt III Project gains momentum, contributing to Morocco's renewable energy ambitions. The project, featuring 400 MW photovoltaic solar capacity and battery storage, plays a pivotal role in achieving the country's target of ...

Morocco's Noor Ouarzazate III solar thermal power plant has been powered up in a bid to carry out necessary technical functional tests before its delivery planned for the last quarter of 2018.

Morocco plans to generate 42% of its energy from renewables by 2020, rising to 52% by 2030, with solar, wind and hydropower each providing a third of the total. The new Ouarzazate Solar Power Station will help Morocco meet its renewable power targets.

The study identifies how Morocco can improve its policy and regulatory framework to reach the full potential of small-scale PV deployment and increase the attractiveness of self-consumption for Micro Small Medium Enterprises and local administrations.

Ouarzazate Solar Power Station (OSPS), also called Noor Power Station (نور, Arabic for light) is a solar power complex and auxiliary diesel fuel system located in the Drâa-Tafilalet region in Morocco, 10 kilometres (6.2 mi) from Ouarzazate town, in Ghessat rural council area.
