

What is lithium consolidated (Li3) doing in northern Mozambique?

Further to the announcement dated 25th March 2019 Lithium Consolidated Ltd ("Lithium Consolidated", "Li3" or the "Company") is pleased to announce it has been granted three (3) new lithium exploration licenses in the Alto Ligonha Pegmatite Province in northern Mozambique (the "Mozambique Licenses" or "Licenses") (see Figure 1).

Why did Mozambique get a lithium licence?

While Mozambique was the world's second largest beryl producer in the 1960s, the lithium-bearing minerals were not exploited during beryl and tantalite mining. Lithium Consolidated managing director Shanthar Pathmanathan said the new licences formed part of the company's broader goal of having a major share of lithium supply from Mozambique.

How will battery technology impact mining in Mozambique?

Mining in Mozambique is set to benefit from battery technology. In addition to raw mineral extraction, the sector is able to open up opportunities to suppliers across the value chain, in providing mining and refinery equipment, maintenance services and machinery and automation equipment.

Who is lithium consolidated?

The award of the licences makes Lithium Consolidated the first ASX-listed company to enter Mozambique for hard rock lithium. The two granted licences cover 10.98 square kilometres and contain historical beryl, tantalite and rare-element mineral mines.

Is premier African Minerals acquiring Mozambique & Zimbabwe?

With Lithium Consolidated Ltd shifting in focus to concentrate on projects in Australia, Premier African Minerals has acquired its Mozambique and Zimbabwe lithium portfolio. Multi-commodity mining and natural resource development company Premier African Minerals Limited announced the development.
