You may be able to see the northern lights from Czechia this weekend ... The astronomer added that parts of the sun's surface erupt when the planet reaches the peak of its 11-year solar cycle. "Denser solar wind is rapidly escaping from the sun in the form of plasma clouds. At the moment, astronomers know of at least three such clouds that ...

Share this on social media Czechia unplugs hundreds of solar plants due to sunny weather (EurActiv, 13 Apr 2023) Sunny weather has forced the Czech state-owned company CEPS to disconnect hundreds of solar power plants from the grid for the first time in history as their high production levels created a surplus that threatened the national power grid.

One of the many reasons to go solar is to go green in a meaningful way. According to the Energy Action Network, 80% of the greenhouse gas emissions in Vermont are attributed to transportation, heating, and electricity production—and Paul Lesure has been able to address all three predominantly with his solar panels.. And solar isn't just a way for him to shrink his own carbon ...
