

Why is a battery conversion so difficult in Namibia?

The biggest hurdle is the cost of the conversion, which is mostly driven by the cost of the battery packs. There are significant duties on batteries and other components in Namibia, and Namibian consumers are also extremely cost sensitive.

What battery pack does E-car Namibia use?

Should Namibia reduce taxes on EVs?

It would be great if the Namibian government reduces, or even better, removes the duties and taxes on the components used by local firms to assemble the EVs. e-Car Namibia has been engaging with all sectors of government via their institutions and ministries to lobby for the creation of an environment that is supportive of EV technology.

The BAT-80 is a next-generation energy storage system designed for commercial businesses seeking reliability, sustainability, and independence from the grid. Seamlessly Adaptable: Fully modular and cloud-connected, BAT-80 is tailored to meet any commercial energy storage and power management needs. Advanced Technology:

The Rivian R1T & R1S will be available with three battery options ranging from 240-410 miles of range.. 105 kWh: 240 miles >\$72,500 135 kWh: 310 miles >\$80,000 180 kWh: 410 miles >\$90,000 135 kWh and 180 kWh versions will be available from launch, with a smaller and cheaper 105 kWh version offered later on. 105 kWh pricing starts from \$69,000 for the ...

By 2025, industry experts and OEMs are forecasting battery pack prices to hover around \$100/kWh, falling further to around \$80/kWh by 2030. There are two routes to achieve \$80/kWh at the pack level: reduce the cost of the input materials and maintain energy density, or increase the energy density at a greater rate

The range is from 100KWh to 700KWh batteries. Product Features: Up to 10 x batteries can be connected in a parallel configuration. 10-year local manufacturer's warranty. Battery power cables come as standard with each battery. Integrated DC breaker for battery isolation and over-current protection; 80% DoD or 4000 cycles.

Torqeedo announced a new 80-kWh battery option for its Deep Blue electric drives--the Deep Blue Battery 80, which has twice the capacity of the previous generation of Deep Blue batteries and uses lithium iron phosphate (LFP) chemistry. The capacity warranty for the new battery was increased to 10 years, compared to Deep Blue Battery 40's 9 ...
