

PV Tech has been running PV ModuleTech Conferences since 2017. PV ModuleTech USA, on 17-18 June 2025, will be our fourth PV ModuleTech conference dedicated to the U.S. utility scale solar sector.

London Stock Exchange-listed investor Gresham House Energy Storage Fund has raised \$120 million (US\$159.86 million) to finance six new energy storage projects. These new near-term acquisitions - totalling 245MW - are part of its c.485MW new pipeline, although small amounts of the funds will go towards existing energy storage projects.

A joint venture (JV) between the two Chinese companies will deliver the 54MW/54MWh Ombuu battery energy storage system (BESS) project in Namibia's Erongo Region, at the existing Omburu Substation. Construction ...

Namibia is set to expand its power storage capacity in the energy sector with the introduction of the first-ever Omburu battery energy storage system (BESS). "The BESS project will help government accomplish ...

Namibia's green energy goal Namibia has a small population of 2.4 million people and a low electrification rate of 56%. It can generate only 40% of its own electricity and relies on imports, mainly from South Africa. The government wants to boost its power capacity to 1,677 MW by 2035, with 60% coming from renewables.

Energy Storage Systems Wind Turbines ... SolTec is dedicated to "Renewable Energy Technology" in Namibia since 1996. They provide proven Renewable Energy Technology like "Solar Water Pumping" or "Solar Water Heating" throughout the country and across borders. Suntech, founded in 2001, as a famous photovoltaic manufacturer in the ...

(EPC) for solar energy with battery storage solutions, water supply and bulk water storage solutions as well as operations & maintenance solutions. The two operating subsidiaries of NEC are NEC Energy (Pty) Ltd & NEC Water & Pumps (Pty) Ltd. Reg. No. 2010/0639 (Energy) Reg. No. 2015/0889 (Water & Pumps) P O Box 5052 Windhoek

Namibia is set to expand its power storage capacity in the energy sector with the introduction of the first-ever Omburu battery energy storage system (BESS). "The BESS project will help government accomplish its goals by ensuring electricity supply security, cost efficiency and self-sufficiency," said NamPower managing director Kahenge ...

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, according to a top local official.

We are proud to serve the world's leading airlines and airports. Whether they need Jet-A1 or AVGAS, our customers know they can rely on us 24/7 to meet their needs - ensuring security of supply, high-quality fuel approved to international standards and fast turnaround times.

UK energy storage investor Gresham House and the clean energy arm of utility NextEra have moved forward with battery storage projects in California, US. The two announcements come shortly after the internal revenue service (IRS) clarified the requirements for the domestic content adder to the standalone energy storage investment tax credit (ITC).

A joint venture (JV) between the two Chinese companies will deliver the 54MW/54MWh Ombuu battery energy storage system (BESS) project in Namibia's Erongo Region, at the existing Omburu Substation. Construction is expected to take around 18 months for the project to come online in the latter part of 2025.

Namibia Power Corporation (NamPower) has recently signed key EPC contracts with Shandong Electrical, Engineering & Equipment Group (SDEE) and Narada Power for the first-ever grid-scale battery energy storage ...

Gresham House Energy Storage Fund has entered a power purchase agreement (PPA) with a subsidiary of Octopus Energy for 14 of its battery projects, totalling 568MW/920 megawatt hours (MWh), in the UK. The two-year fixed-price contracts, in place from 1 July 2024, cover approximately half of the company's 1.07GW target portfolio.

This is the first power storage project in Namibia. Located in Omaburu, Erongo Province, northern Namibia, the project aims to address the demand for power shortages, reduce the impact of unstable photovoltaic power generation on the power grid, and improve the quality of electricity used by residents in the region.

The collaborative effort is aimed at spearheading the development of the country's inaugural 54 MW/54 MWH utility-scale Battery Energy Storage System (BESS). The BESS represents a monumental advancement enabling the storage and timely distribution of electricity as per demand, an essential innovation in the country's energy infrastructure.
