

National subsidies for farmers to install photovoltaic panels

Will low-income households get affordable solar energy?

SALAS: (Speaking Spanish). SIMON: Soon, more low-income households like his will get affordable solar energy. A new Environmental Protection Agency program is giving \$7 billion to programs that fund rooftop solar panels, batteries to store solar energy and something called community solar.

How can farmers benefit from solar energy?

Farmers can benefit from solar energy in several ways--by leasing farmland for solar; installing a solar system on a house, barn, or other building; or through agrivoltaics. Agrivoltaics is defined as agriculture, such as crop production, livestock grazing, and pollinator habitat, located underneath solar panels and/or between rows of solar panels.

Can farmland be used for solar energy?

There is significant opportunity to produce large amounts of solar energy on farmland. Agricultural land in the U.S. has the technical potential to provide 27 terawatts of solar energy capacity. This is a quarter of the total U.S. solar energy capacity of 115 TW. Only 0.3% of farmland is expected to be used for solar energy by 2035.

What is the \$7 billion solar for all program?

Oops, something went wrong. Check your browser's developer console for more details. Under the \$7 billion Solar for All program, the 60 grant recipients will create new or expand existing low-income solar programs, which will enable over 900,000 households in low-income and disadvantaged communities to benefit from distributed solar energy.

Is solar for all a national program?

Some states and communities have already had Solar for All programs, but the \$7 billion in grants authorized by the Inflation Reduction Act and awarded this week by the US Environmental Protection Agency will allow for a national adoption of the model. What is Solar for All?

How will EPA's 60 solar for all program help low-income households?

EPA estimates that the 60 Solar for All recipients will enable over 900,000 households in low-income and disadvantaged communities to deploy and benefit from distributed solar energy. This \$7 billion investment will generate over \$350 million in annual savings on electric bills for overburdened households.

They should then suggested the size and type of solar panel system suitable for the farm's needs.? Get to work: Take those recommendations and make them happen! That might mean ...
