

What is Natron Energy?

At Natron Energy, we're changing the way the world looks at critical power and industrial batteries for high-powered applications like AI, data centers, peak shaving, and power quality management. Natron sodium-ion solutions outperform, are significantly safer, and are far more sustainable than lithium-ion options. Who is Natron Energy?

Why is Natron Energy launching a sodium-ion battery manufacturing facility?

“Today is a momentous day for Natron Energy. This flagship manufacturing facility will dramatically accelerate our efforts to deliver sodium-ion batteries to customers who are hungry for safe, reliable, and environmentally responsible energy storage solutions,” said Colin Wessells, Founder and co-CEO, Natron Energy.

Who makes Natron batteries?

Build America. Buy America. With products sourced from minerals readily available in the U.S. and manufactured in Michigan, Natron Energy is a U.S. company that meets BABA requirements. The Power of Blue. The secret behind Natron's sodium-ion batteries is our patented use of Prussian blue electrodes.

What makes natron a good battery?

Natron's sodium-based chemistry stores and releases energy, more often and more efficiently than any other battery available in the world. Sustainably Sourced. Unlike lithium-ion batteries that rely on conflict materials, Natron Energy's sodium-ion batteries are built using only abundantly available elements and offer unmatched sustainability.

Does Natron Energy have a mass production plan?

Two years ago, sodium-ion battery pioneer Natron Energy was busy preparing its specially formulated sodium batteries for mass production. The company slipped a little past its 2023 kickoff plans, but it didn't fall too far behind as far as mass battery production goes.

What makes Natron Energy batteries different?

Natron Energy batteries and systems outperform lithium-ion and lead acid batteries in power density, recharging speed, and expected lifecycle thanks to our unique sodium-ion battery technology. Turning Chemistry into Currents.

Natron Energy manufactures sodium-ion battery products based on a unique Prussian blue electrode chemistry for a wide variety of industrial power applications ranging from critical backup power systems to EV fast charging and system hybridization.

Battery Performance on a Different Level. Our batteries have a maximum sustained power-per-energy up to

four times higher than lithium-ion and more than five times higher than lead acid batteries.. Our batteries deploy their energy load immediately with no settling or thermal waiting.. In addition, Natron sodium-ion batteries deliver up to 10 times as many deep discharges as ...

Natron provides energy storage solutions for in-rack and centralized power architectures. For in-rack power, a 48V, 8kW battery tray is deployed alongside data servers for local energy management services. For centralized power, a ...

Two years ago, sodium-ion battery pioneer Natron Energy was busy preparing its specially formulated sodium batteries for mass production. The company slipped a little past its 2023 kickoff...

Using Natron's patented Prussian blue chemistry, sodium-ion batteries demonstrate clear advantages over traditional lithium-ion battery technology - in addition to providing a safer, more powerful, sustainable battery solution. For more information or with any questions, visit [natron.energy](https://natron.energy). References 1 Inflation Reduction Act of 2022

Natron Energy makes sodium-ion batteries strictly for commercial and industrial use. If you're a business or supplier that has an inquiry, feedback or an issue we can help address, please provide information below. PLEASE READ BEFORE SUBMITTING THIS FORM. Please note that Natron makes batteries for industrial applications only.

Natron Energy invested over \$40 million to upgrade the existing infrastructure, transforming it from a Lithium-ion production facility. The total investment for this futuristic plant now stands at \$300 million. Additionally, the project received a \$19.8 million boost from the ARPA-E's SCALEUP program.

With products sourced from minerals readily available in the U.S. and manufactured in Michigan, Natron Energy is a U.S. company that meets BABA requirements. See the science. "Natron's sodium-ion battery chemistry uses no conflict minerals, so they support our commitment to the environment, and their batteries are designed and manufactured ...

While many energy storage system solutions currently use lithium-ion batteries, Natron Energy specializes in sodium-ion batteries. Keep reading to learn why this is important and how you can invest in Natron Energy. What does Natron Energy do? Unlike lithium -- which is rare, expensive, and difficult to mine -- sodium is abundant.

Natron's revolutionary sodium-ion battery technology leverages Prussian Blue electrode materials to deliver a high power, high cycle life, completely fire safe battery solution that's created sustainably with abundantly available elements.

Natron Energy's project in the state, which will officially be executed through a newly formed subsidiary company, will be facilitated in part by a Job Development Investment Grant (JDIG) approved by the state's Economic Investment Committee earlier today. Over the course of the 12-year term of this grant, the project is estimated to grow ...
