Energy storage is of particular interest to large energy-intensive businesses, especially those who need to ensure electricity reliability and availability. For corporations operating in markets with unreliable grid infrastructure or in remote environments, it can also help eliminate the need to rely on backup generators which often run on diesel.

To manage business in Sub Sahara area, such as sales, installation and maintenance service, technical support, training, etc, in connection with telecommunication, data center infrastructure, server storage solution, energy,

managed service, safety & security and cloud service.
