In EVE Online the energy weapons use focusing crystals that give you the trade-offs of range vs damage that other weapon classes get due to mass/explosive yield. Each crystal results in a specific color beam even though all of them are named after non-visible light bands. Necrons could just pop a different crystal in for that sweet sweet glow.

this will be the first time i paint minis, so i have no experience choosing paints etc. im envisioning silver necrons, not bright shiny silver but also not too dark, with red energy instead of the usual green. basically like this, but a bit lighter en without the weathering for the silver en brighter red for the energy.. i was thinking this black primer from armypainter as primer.

Necron tech therefore has very narrow energy levels and are possibly what physicists refer to as "quantised"; which means restricted and is a fundamental idea in quantum mechanics. With the space age tech that necrons have, being able to manipulate quantum phenomena to work as a shield or to allow their weapons to bypass enemy shielding is ...
