The findings of this roadmap show that power sector is a key area, where the ongoing efforts from the deployment of solar PV should be continued and complemented with and improvement of efficiency in Kiribati's entire energy system, including electricity use, heating, cooling, and ...

While most solar PV systems that are co-located with battery storage have in past been AC-coupled, requiring two separate inverters, one for the solar and one for the battery system, there has since about 2018 been a rise in the number of project developers and designers electing to go DC-coupled.

The findings of this roadmap show that power sector is a key area, where the ongoing efforts from the deployment of solar PV should be continued and complemented with and improvement of efficiency in Kiribati's entire energy system, including electricity use, heating, cooling, and transport.
