

What are the latest developments in innovation at Neste?

As a concrete example of the recent developments in innovation, Neste is developing two projects that contribute to further developing the Porvoo refinery in Finland into renewable hydrogen and CO2 utilisation as well as advanced biofuels production from lignocellulosic wastes and residues.

Where can I buy Neste my renewable diesel in Sweden?

Neste MY Renewable Diesel sales in Sweden is aimed initially at the transport industry and other business customers and is sold via the distributors Swea Energi, Biofuel Express, Ecobränsle, Colabitoil and Energifabriken. But the fuel works just as well in private cars and can easily replace traditional diesel here as well.

Is Neste a renewable fuel?

Tests of the new fuel are ongoing together with Powertrain Engineering Sweden AB, a supplier to Volvo Cars. Powertrain Engineering Sweden, which supplies Volvo Cars and other manufacturers with powertrains and the next-generation hybrid system, is now evaluating Neste's renewable gasoline.

What does Neste do?

Neste (NESTE, Nasdaq Helsinki) creates solutions for combating climate change and accelerating a shift to a circular economy. We refine waste, residues and innovative raw materials into renewable fuels and sustainable feedstock for plastics and other materials.

Is Neste a Renewable Diesel Company?

With 2.7 million tons, Neste is responsible for the majority of total renewable diesel production globally. Neste MY Renewable Diesel reduced climate emissions by 8.3 million tonnes of CO2 in 2017. This is equivalent to taking more than 3 million fossil-fuel cars off the roads or making a city the size of Stockholm car-free for 8 years.

What is Neste's Innovation Unit?

To ensure future growth in renewable and circular solutions, Neste's Innovation unit focuses on scalable and sustainable sources of renewable raw materials and their required technologies in the business platforms.

Powertrain Engineering Sweden, which supplies Volvo Cars and other manufacturers with powertrains and the next-generation hybrid system, is now evaluating Neste's renewable gasoline. "We are following the development of renewable fuels, such as Neste's renewable gasoline, with great interest, and we believe it has great potential.

Neste, a world leading producer of renewable diesel and sustainable aviation fuel (SAF), are developing a renewable gasoline for such commercial use in the existing fleet. The final phase of testing is now beginning

with the target to complete commercial tests of the fuel, and thereby enabling significant reductions of greenhouse gas emissions ...
