

Who is Viking cold solutions?

Viking Cold Solutions is a thermal energy management company, making cold storage systems more efficient, delivering environmental benefits and cost savings. Thermal Energy Storage Systems offer efficiency and flexibility for improved demand management, temperature stability and costs.

What is Viking cold?

London's Energy Institute names Viking Cold as their annual Technology Innovation For our Thermal Energy Storage technology's contributions to the stability of the electrical grid and improved refrigeration sustainability. TES in an Ammonia Refrigerated Low-Temperature Warehouse Decreased consumption 43% and demand 29% for 13 hours.

How do I contact Viking cold solutions?

For more information on Thermal Energy Storage contact sales@vikingcold.com. Viking Cold Solutions is a thermal energy management company, making cold storage systems more efficient, delivering environmental benefits and cost savings.

Is New Caledonia hot or cold?

The average monthly temperature in New Caledonia throughout the year is around 24°C in the shade; therefore, New Caledonia is not particularly hot or cold.

How does Viking cold work?

Viking Cold's innovative application of environmentally-friendly Phase Change Materials (PCM) and cloud-based intelligent controls and monitoring combines energy storage with efficiency to enable flexible energy management and reduced energy costs.

How did Vikings survive the Cold?

One of the most important aspects of surviving the cold was proper clothing and shelter. The Vikings wore woolen garments made from sheep's wool, which was abundant in Scandinavia. Wool was an excellent insulator, and Vikings would layer their clothing to trap heat close to their bodies.

Viking Cold Solutions has had its thermal energy storage (TES) technology validated after a two-year evaluation study by environmental consulting firm D+R International on behalf of utility Southern California Edison (SCE), part of Edison International.

We believe that when we are challenged we are changed. And when faced with the force of the cold a powerful change rises from within. In the first Brass Monkey documentary series, we ...

The cold winters of Scandinavia and the North Atlantic were a constant challenge for the Vikings, but they

developed various strategies to adapt and thrive. In this blog post, we will explore how the Vikings survived and adapted to the cold.

We believe that when we are challenged we are changed. And when faced with the force of the cold a powerful change rises from within. In the first Brass Monkey documentary series, we explore how the cold connects people, brings joy, restores minds, repairs bodies, teaches, and challenges us like nothing else on earth.

The cold winters of Scandinavia and the North Atlantic were a constant challenge for the Vikings, but they developed various strategies to adapt and thrive. In this blog post, we will explore how the Vikings survived and ...

Viking Cold Solutions(TM) is a thermal energy management company focused on making the world's cold storage systems more efficient, flexible, and sustainable while protecting food quality. Our long-duration Thermal Energy Storage (TES) Systems, with a levelized cost of energy (LCOE) less than 2 cents per kWh, have been installed inside frozen ...

Living in Scandinavia and settling in some of the coldest habitable regions on Earth, the Vikings were masters at overcoming long, dark winters. But without electricity or central heating, how did the Vikings not only survive, but thrive, through the cold months?

Living in Scandinavia and settling in some of the coldest habitable regions on Earth, the Vikings were masters at overcoming long, dark winters. But without electricity or central heating, how did the Vikings not only ...

The Next Generation Elite Viking redefines cold plunging, making it easier, more enjoyable, and more versatile than ever. Its auto-priming chiller ensures a hassle-free setup, while the system delivers an invigorating cooling experience, reaching ...

The Next Generation Viking makes cold plunging effortless, enjoyable, and versatile. Featuring an auto-priming chiller that cools water to an invigorating 35°°F, an ultra-quiet motor for tranquil immersion, and FlowSense(TM) protection for enhanced ...

Viking Cold Solutions has had its thermal energy storage (TES) technology validated after a two-year evaluation study by environmental consulting firm D+R International on behalf of utility Southern California ...
