

Who should take a solar installation course?

This course is suitable for any electrician who wants to become a domestic solar installer & gain the skills to install solar PV (Photovoltaic) systems.

Does a PV inverter need a PEW certification?

However the work on the LV-alternating current (AC) side of the system, including the inverter, is PEW and will require certification. If this PV system is an independent supply and the inverter is not paralleled to a mains supply it will not require an inspection.

Is going solar a good idea in New Zealand?

Going solar helps the environment - it creates clean, green energy and is a great way to reduce your carbon footprint. Going solar demonstrates your commitment to sustainability and will help New Zealand achieve its target of net zero greenhouse gas emissions by 2050. Is your property suitable for solar?
