

Do you need a backup power generator?

Proper home maintenance is all about planning and preparation. Given the uptick in extreme weather, that may mean investing in a backup power generator to keep your home running in the event of disaster or an extended power outage.

Can a backup generator be used as a primary power source?

The backup generator is designed as a backup to utility power only and should not be used as a primary power source. Answer a few questions so we can connect you with local dealers who will provide custom quotes. Equipping your home with permanent backup power requires a solution as unique as your home and the way you live in it.

What generators do you need for a power outage?

A one-time roofer and a serial remodeler, Dan can often be found keeping house at his restored Brooklyn brownstone, where he lives with his wife and kids. During a power outage, a reliable generator from a leading brand like Generac, Kohler and Craftsman will keep your home running and loved ones safe.

Does a Generac home backup generator provide peace of mind?

Laurann M. of Los Angeles, California shares how her Generac home backup generator provides her family with peace of mind. Carlos M. shares his story on how his Generac home backup generator kept his family warm and safe during an unexpected ice storm.

How does a backup power generator work?

Backup power generators provide electricity to the home with the use of two main components: a gas- or battery-powered engine that turns an on-board alternator to generate alternating current (AC) electrical power.

Should you buy a generator as a backup solution?

There are two primary reasons that homeowners have historically opted for generators as a backup solution: They cost less upfront and, in the past, they've been easy to find and set up. You can frequently buy backup generators at home improvement stores, and some might not even need to be installed by an electrician. But generators aren't perfect.

You will likely need at minimum a 10,000 Watt or 10kW generator to power a whole house. There are portable generators, that are cheaper than stationary home backup generators, in the 10,000 and 15,000 watt range. But likely, if you want a true home backup generator system, you will want a stationary generator in the 16,000kW and higher range.

A Generac standby generator protects your home and gives you peace of mind. When the power fails, you'll be ready. With automatic operation and 24/7/365 support from our Wisconsin headquarters, a Generac backup

generator gives ...

A whole-house generator, or standby generator, functions by providing automatic backup power to an entire home during power outages. It's integrated into your home's electrical system and usually runs on natural gas or propane. When the generator detects a power disruption, it activates automatically.

A portable power station and solar generator are ideal backup power sources. Since these devices operate independently of the power grid, they stay clear from any impact of a widespread outage. In other words, when the grid is down, your lights, Wi-Fi, and other essential electronics can still be up and running, thanks to these independent power sources.

Choosing the best home backup generator involves several crucial considerations, from understanding your unique power needs to selecting the right type of generator and fuel options. Noise level is also a vital factor, particularly for those living in quiet neighborhoods or having small children.
