

Does home assistant support network storage?

Even better: You can use it as a target for your backups so that when Home Assistant creates a backup for you, it will store it directly on your network storage. Multiple network storages are also supported; if you like, you can easily add more.

How do I expand my home assistant storage?

When you are running Home Assistant Operating System, you can use the following options to expand your storage: Replace your current storage medium, for example, the SD card, with a bigger one. Use a backup to restore Home Assistant from backup on the new SD card.

What does the new YouTube integration mean for home assistant?

For example the new YouTube integration. The YouTube integration allows you to connect YouTube channels to Home Assistant. What does that even mean? I think it would be great if some of the most important sensors would be listed so we can get an idea of what to expect from an integration.

When you install the Frigate add-on, it should now automatically utilize this for storage due to the add-on defaulting to `"/media/frigate"` as the storage path. This worked for me. Next, install the Frigate (Full Access) Add-on.

Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts. Perfect to run on a Raspberry Pi or a local server. Available for free at [home-assistant.io](https://home-assistant.io).

Developers recommend a class 10 sd card with 32 GB of storage but I only have a old 16GB sd card from my phone . Does anyone run out of storage with 16Gb? ... Home Assistant Community Is 16GB of storage enough to run HA? Installation. BlackBerry\_pi (Zing) February 24, 2018, 12:24pm 1. Hey everyone, is 16 GB of storage enough ? Developers ...

In the UI, creating the Network Storage "share" seems successful as no errors are produced. The created share is NOT visible in "Media" & "My Media" in the UI. Using Samba Share, I navigate to the Media folder and I see the share has indeed been created, and I can navigate the files.

Hi everyone! I've just installed HA on a mini pc with in a primary SSD and a slave HDD. In order to do not use the SSD as the disk to store the historical data, logs, etc... I'd like to move them into the HDD. I know, it has less performance than the SSD but, you know, SSD are not really designed for high updated data changing continuously. Is there any way to do that ? it ...

One essential aspect of Home Assistant is network storage, which allows you to store and access your important data from anywhere in your home. In this guide, we will walk you through the process of setting up ...

Hi! Is it possible to mount a NAS drive as a network storage (ConfigSystemStorage) with some kind of script or automation? I would like to make a starting sequence like this: when Samba NAS is loaded => map this network storage => start Frigate Currently the OS try to mount the network storage sooner, then Samba NAS is ready. Thanks ...

The ability to have HA OS mount network shares is a fantastic new feature of 2023.6. For some of us, it's been long awaited. So far all we have is the documentation here, and some posts in the release thread. I'm starting ...

Hello, Every few hours I get "Network storage device failed". The network storage is attached to Raspberry Pi (OMV) and is normally accessible from local computers when HA comes up with this message. After I hit "reload" the message disappears. Anyone experienced something similar?

Ok I tentatively have something working with a VM running HassOS to represent the Home Assistant Green and here was my process in case anyone is curious:. Created a USB for udev loading based on the thread located here: [SOLVED] Mount USB drive in Hassio to be used on the Media Folder with udev customization Formatted the external drive ...

Even better: You can use it as a target for your backups so that when Home Assistant creates a backup for you, it will store it directly on your network storage. Multiple network storages are also supported; if you like, you can easily add more.

Can someone give me detailed instructions on accessing the hidden files in ".storage" ? I just got a brand new HA Blue and in the process of getting it going I somehow have the wrong username and password. Instructions under Authentication - Home Assistant mention deleting some files from .storage but nobody gives details on how to do it. Unfortunately SSH ...

If the network storage was reachable when you started Home Assistant (or rather Supervisor specifically), then the mount is being setup. From that point onwards, it is on Linux to retry/reconnect in case the server goes down.
