Eaton Nissan xStorage Buildings selects the right power sources according to the load, the grid constraints and the availability of renewable energy. This system allows end users to store energy so that it can be used on demand to power the business or to participate in demand response programs - selling energy back to the grid.

xStorage Home combines power electronics from global power management leader Eaton with new or used lithium-ion batteries from Nissan LEAF electric vehicles. It can be installed in a home as a hub for incoming and outgoing power, connecting renewable and grid power to the home and can, in some cases, even support

Eaton Nissan xStorage Buildings selects the right power sources according to the load, the grid constraints and the availability of renewable energy. This system allows end users to store ...

xStorage Home er et energilagringssystem, plassert i en enkelt enhet, som integrerer en batteripakke og en hybrid omformer. xStorage Home gir lagring av solenergi og lar deg høste fornybar energi som produseres på dagtid så du kan bruke den om morgenen, ettermiddagen og om natten. xStorage Home gir også energi til husholdninger hvis nettet svikter, og gir strøm til ...

Let's get more technical. xStorage Home is designed to be the most reliable and affordable energy storage solution on the market today. xStorage Home combines second-life Nissan Leaf battery modules with Eaton power quality technology and electronics. It's simple to install and use. How it works. When connected to your residential power supply and/or renewable energy ...

Si vous avez des panneaux solaires, xStorage Home vous permet d'optimiser leur utilisation. Si vous n'avez pas de panneaux solaires, vous pouvez acquérir xStorage et Nissan Energy Solar sous forme d'achat groupé. Avec xStorage, vous utilisez l'énergie solaire stockée selon vos besoins, même quand le soleil fait défaut.

Eaton Nissan xStorage Buildings selects the right power sources according to the load, the grid constraints and the availability of renewable energy. This system allows end users to store energy once produced so that it can be used on demand to power the business or to participate in demand response programs selling energy back to the grid.

An initiative in Europe, xStorage gives Nissan's electric vehicle batteries a second life. After they're no longer powering cars, they still have enough juice to power energy storage systems for homes. Nissan partnered with Eaton to create a system that lets you control how and when to put the energy to use, so you can save money and take a ...
