Why is Mytilineos investing in the energy transition?

MYTILINEOS is strategically investing in the national and global goal of the energy transition, putting all its forces at the service of sustainable development. Mytilineos Group subsidiary Metka EGN has signed a 10-year power purchase agreement (PPA) with Australia's second-largest supermarket chain Coles.

What is a Mytilineos commitment?

The commitment forms part of a broader investment scheme from Mytilineos that will support the development of 2.6GW of solar PV and storage assets across the EU through 2027. Image: Mytilineos

Telecommunications giant Vodafone UK has signed a second corporate solar power purchase agreement (PPA) with Mytilineos and Centrica. The deal covers generation from five sites with a total capacity of 232MW, located in Norfolk, Nottinghamshire, Staffordshire, Buckinghamshire and Dorset.

The deal covered generation from five sites with a total capacity of 232MW, located in Norfolk, Nottinghamshire, Staffordshire, Buckinghamshire and Dorset. In total, the sites are expected to generate 216GWh of electricity once all are operational by Q1 2024.

Chairman & CEO Ev. Mytilineos, welcomed all to a new era for MYTILINEOS, based on the global trends of energy transition and digital transformation and focused on sustainable development and circular economy. With this new transformation "MYTILINEOS -Energy & Metals" is being created.

MYTILINEOS will oversee the engineering, procurement and construction of the civil works, the balance of plant and the installation of all equipment. The project's design phase will begin in January 2024 and construction in 2025.

GE Vernova's Grid Solutions business and MYTILINEOS Energy & Metals have jointly secured a contract to support the construction of the first high-capacity east coast subsea link in the UK.

MYTILINEOS has revealed that its subsidiary, METKA EGN, has signed an EPC deal with HC ESS3 Ltd for a 20MW hybrid energy storage system (ESS) project in the UK, which will provide Fast Frequency Response (FFR) and other ancillary services to the National Grid.

Utilities are at the centre of the energy transition, and the ability to make bold, agile decisions will be a key factor in determining their success in the future, according to Kostas Horinos from Mytilineos Energy & Metals.

Greek conglomerate Mytilineos has announced its acquisition of a portfolio of solar photovoltaic projects and battery energy storage projects from Egnatia Group for a total cost of \$67.9m (EUR56m).
