

Norfolk Island solar powered home backup generator

What is a backup solar generator?

Backup solar generators provide backup power for when an electrical grid fails, providing an efficient alternative for installing a complete system. Backup solar generators provide enough power to turn on appliances such as refrigerators, washing machines, televisions, and more in the event of a blackout.

Can solar power be used as a backup power supply?

In most cases, your backup power supply will come from a generator or a battery. Today's solar batteries are also intelligent energy management systems that can optimize your home's energy usage to take advantage of utility time-of-use plans or to ensure that your electric car is charged with solar power.

Who is a premium solar installer for the Hampton Roads area?

As a premium solar installer for the Hampton Roads area, we provide you with the best solar and backup power solutions for homeowners who are in the Dominion Energy, Dominion Virginia Power, Southside Electric Cooperative, Rappahannock Electric Cooperative, Community Electric Cooperative, and Xcel Energy service areas.

How many watts can a backup solar generator power?

Smaller units typically have a lower power capacity and can only charge small devices. Backup solar generators can typically power at least 1,000 watts, which should be enough to power appliances like small lights, a fridge, or a television.

Can a solar generator support off-grid living?

Yes. Some generators use electricity or gas for power, and all power generators are able to support off-grid living. However, some people prefer solar generators for the following reasons: They're more eco-friendly because they use energy from the sun as opposed to fossil fuels.

Can a whole-house generator be connected to a rooftop solar panel?

Large whole-house generators can be integrated with rooftop solar panels, functioning similarly to a battery backup system like the Tesla Powerwall, storing energy until it's needed. Solar generators of all sizes can also be charged with portable solar panels, which connect to the battery via a standard solar cable.
