support@nrgsystems | Page 1 25 February 2022 Introduction The Hukseflux SR30 is a Class A digital pyranometer with a built-in heater & ventilator. The current version, SR30-M2-D1, has a Modbus RS-485 output. These instructions explain how to configure a SymphoniePRO data logger to use with the SR30-M2-D1. Hukseflux SR30 Configuration

Benefits UNRIVALED EASE-OF-USE. Even with significant advancements in capability and flexibility, SymphoniePRO continues and improves on the Symphonie legacy as a data logger that is simple to use--offering everything ...

NRG Systems has been helping solar farm developers collect accurate solar measurement data for over three decades. We understand that a successful solar measurement campaign is an essential step in securing project financing and making other vital decisions, which is why we design, manufacture, and support fully-integrated solar measurement systems that are both ...

About NRG Systems. NRG Systems is the global leader in wind and solar resource measurement and intelligence. Their hardware, software, and related services empower many of the world's largest developers to make informed decisions and improve efficiency at ...

NRG Cloud. NRG Cloud is the intuitive, web-based data management platform for NRG's industry-leading resource measurement hardware. NRG Cloud offers an unparalleled data ecosystem that transforms raw wind and solar measurement data into actionable insights.

Solar Systems. NRG's Flare solar portfolio includes two turnkey solar resource measurement systems - the Flare SRA System for the early prospecting and formal pre-construction resource assessment of utility-scale PV projects, and ...

Solar Systems. NRG's Flare solar portfolio includes two turnkey solar resource measurement systems - the Flare SRA System for the early prospecting and formal pre-construction resource assessment of utility-scale PV projects, and the Flare SRM System for performance monitoring per IEC 61724-1:2017.. Standardized for a repeatable experience

Please contact [bats@nrgsystems](mailto:bats@nrgsystems) to learn more about our system configurations. Details; Specifications; FAQs; Product Support; Details HOW IT WORKS. The deterrent system emits an ultrasonic acoustic field in the same range as bats' natural calling frequencies. This interferes with their ability to receive and interpret their own ...

Wind. NRG Systems has been designing and manufacturing wind measurement solutions for over four decades. We pioneered the complete system approach to wind resource assessment and have gone on to apply the concept of turnkey solutions to all stages of the project lifecycle, including power performance testing, wind plant optimization, and monitoring.
