

Does Trinidad and Tobago have fossil fuel resources?

Trinidad and Tobago has abundant local fossil fuel resources, but is taking steps to prepare the societal, legal, regulatory, and economic foundations necessary to support renewable energy and energy efficiency technologies.

Who regulates the energy sector in Trinidad & Tobago?

The MEEI (Ministry of Energy and Energy Industries) manages Trinidad and Tobago's oil, gas, and mineral resources. The MEEI is responsible for monitoring, controlling, and regulating the country's energy and mineral sectors. The Regulated Industries Commission also serves as a regulator for the energy sector.

Where does Trinidad and Tobago get its energy from?

This page is part of Global Energy Monitor's Latin America Energy Portal. Trinidad and Tobago derives almost all of its energy from domestically produced hydrocarbons, especially natural gas.

Who owns the energy in Trinidad & Tobago?

In 1994, it divested from its generation holdings on the larger island of Trinidad and now purchases energy from three Independent Power Producers (IPPs): the Power Generation Company of Trinidad and Tobago, which purchased the former T&TEC-operated plants and presently controls 1,386 megawatts (MW) of gas-fired capacity across

What is the Nationally Determined Contribution plan for Trinidad & Tobago?

The government's Nationally Determined Contribution plan released in 2018 calls for Trinidad and Tobago's power generation, transportation, and industrial sectors to reduce emissions by 15% relative to business as usual by 2030. The MEEI (Ministry of Energy and Energy Industries) manages Trinidad and Tobago's oil, gas, and mineral resources.

Does Trinidad & Tobago need energy subsidies?

Unlike many island nations, Trinidad and Tobago has significant oil and natural gas reserves and is a net exporter of these fuels. However, subsidies for domestic energy consumption have created a fiscal burden on the government that could be reduced through the expansion of alternative transportation fuels, energy efficiency, and renewable energy.
