The proposed Lamu Coal Power Station is a potential 1,050 MW (1,410,000 hp) coal-fired thermal power station in Kenya. The proposed plant would be developed on 865 acres of land and feature a 210 meter tall smoke stack, which would become East Africa's tallest structure. It would have been the first ever coal power plant in Kenya.

Located at Kipevu in Mombasa. Kipevu III is the largest diesel plant in East Africa and comprises of 7 diesel engines and is connected to the national grid via a new 132KV switch yard extension. Contract to construct the power station was signed on 27th November 2009 between KenGen and Warstila Oy of Finland.
