

How does connect Saint Helena generate electricity?

At present approximately 75% of the islands electricity is generated from burning fossil fuel (diesel). We have 4 generators which have a total capacity of 5,400kW. Connect Saint Helena Ltd is committed to reducing reliance on diesel power generation by harnessing renewable energy sources.

How many generators does connect Saint Helena have?

We have 4 generators which have a total capacity of 5,400kW. Connect Saint Helena Ltd is committed to reducing reliance on diesel power generation by harnessing renewable energy sources. Renewable energy is cheaper to produce and does not harm the environment.

How can connect Saint Helena reduce reliance on diesel power?

Connect Saint Helena Ltd is committed to reducing reliance on diesel power generation by harnessing renewable energy sources. Renewable energy is cheaper to produce and does not harm the environment. We currently have 12 wind driven turbines located at Deadwood Plain. These turbines provide in excess of 20% of the islands electricity.

A Project to retrofit solar renewable energy and natural lighting into the Environment, Natural Resources & Planning (ENRP) Building at Scotland, St Paul's, has recently been completed (see photos attached). The Project was announced by His Excellency the Governor at the Queen's Birthday Garden Party at Plantation House in June 2021 and was ...

NTS-Energy zasłużyli na 5 \*, a w szczególności Pan Paweł z Markiem za bardzo sprawny i estetyczny montaż pompy ciepła Hitachi Yutaki 8 kW. Wybrali na NTS bo uzyskałem z niego szereg istotnych informacji dotyczących samej pompy jak i sposobu jej montażu. Już był montaż i radosna chwila samego uruchomienia wykonana ...

NTS-Energy wychodzi naprzeciw oczekiwaniom mieszkańcom miasta Wrocław oraz okolic, oferując innowacyjne powietrzne pompy ciepła, których największą zaletą stanowi niezależność od cen nośników energii, takich jak gaz czy węgiel, a przy tym niskie koszty eksploatacji. Pomimo tego, że powietrzne pompy ciepła do działania ...

SHG has been made aware that the operation of an additional sea freight service to St Helena is being considered by a private shipping company, under the agency of Meihuizen International. Last year SHG invited tenders from parties interested in providing a longer term sea freight service to the island. Following a procurement process, SHG [...]

At OnPath Energy, we're powering a more sustainable future through renewable energy. Our projects, like the proposal for Mill Rigg Wind Farm will inspire and enable communities, businesses, and landowners to embrace

a just transition to net zero. Potential energy generation: 33.4 MW, enough to supply more than 45,000 homes

Joining us from University of Southampton, Prof. John Langley, Head of Characterisation and Analytics, Chemistry, present on the latest advancements in renewable and sustainable fuel analysis.
