

What is Ocean Sun?

Ocean Sun is using ring structures inspired by these fish farms to suspend a membrane on which solar panels can sit. "We are basing the design premise on tried and tested and proven and bankable technologies that have been used in the sea for decades," says Are Gl&#248;ersen, Ocean Sun's Director for Asia.

What is OTEC (ocean thermal energy conversion)?

An OTEC (Ocean Thermal Energy Conversion) experimental installation was designed and built by a French naval firm, NAVAL ENERGIES, and experimented at Reunion University (Fig. 1). Sized to obtain 15 kW gross power, its objective is to test the Rankine cycle components and in particular heat exchangers (condenser and evaporator).

Is Singapore's sunseap building a floating solar farm?

Singapore's Sunseap is already building a floating solar farm in the Strait of Johor that's expected to generate enough power for about 1,250 apartments. In August, construction began on a 60Mw floating array on the Tengeh reservoir.
