

Who is octillion?

Since 2009, with deep roots in California, Octillion continues to drive EV innovation forward. We do so by creating customized, value-driven battery systems for clients -- at mass scale -- to drive the clean energy shift to electrification across transportation, industrial equipment, and the grid.

Is octillion power systems a private company?

Octillion Power Systems is a Private company. What is Octillion Power Systems's current revenue? The current revenue for Octillion Power Systems is . How much funding has Octillion Power Systems raised over time? Octillion Power Systems has raised \$132M.

Who is octillion energy?

Octillion Energy Holdings, Inc. is a leading multi-national energy storage company that specializes in designing and manufacturing battery systems for major industries focused on electrified product lines.

Where is octillion made?

With customers around the globe, Octillion satisfies this need with manufacturing plants in key regions: North America, Asia, and South Asia. Our state-of-the-art facilities allow for nimble, value-based mass-production--enabling OEMs to affordably take their projects from concept-to-volume production with unrivaled speed, quality, value.

Who founded octillion US?

Founding of Octillion US by Dr. Peng Zhou. Started development of cylindrical power battery pack system (BEST). Secured our first auto OEM partner and established a research and development and manufacturing center for EV series battery system. Completed our Series A financing and raised an aggregate amount of US\$1.0 million.

Where are octillion batteries manufactured?

More and more, as the world embraces electric transportation, the need for innovative battery systems manufactured sustainably, efficiently and cost-effectively is pronounced. With customers around the globe, Octillion satisfies this need with manufacturing plants in key regions: North America, Asia, and South Asia.

The company's products undergo a design process, including extensive thermal modeling, fully integrated battery management systems, and standardized production processes that offer a customized package service, ...

Octillion Power Systems is a large company which focuses on developing Lithium Ion battery packs for Industrial use. The company is already expanding to its third manufacturing facility to meet customer demand,

which will take annual production capacity to more than 1 GW.

Since 2009, with deep roots in California, Octillion continues to drive EV innovation forward. We do so by creating customized, value-driven battery systems for clients -- at mass scale -- to drive the clean energy shift to electrification across transportation, industrial equipment, and the grid.

Octillion is a pioneer and leader in the development of competitive EV battery systems in China offering customized and consistently high quality products to our customers. Dr. Peng Zhou is our co-founder, chairman and chief executive officer.

It's a challenging, competitive, capital-intensive arena -- and it's one in which Octillion Power Systems excels. Established in 2009, the Richmond, California-based company specializes in the design and production of lithium-ion battery packs for ...

With customers around the globe, Octillion satisfies this need with manufacturing plants in key regions: North America, Asia, and South Asia. Our state-of-the-art facilities allow for nimble, value-based mass-production--enabling OEMs to affordably take their projects from concept-to-volume production with unrivaled speed, quality, value.

The company's products undergo a design process, including extensive thermal modeling, fully integrated battery management systems, and standardized production processes that offer a customized package service, enabling industries to get simple and rapid access to energy storage systems.

Between 2021 and 2023 Octillion designed 317 EV battery systems. With state-of-art manufacturing on three continents--in China, India, and the U.S.--Octillion offers a unique value-add model that allows provides regional supply chain ...
