Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll ...

The first step in sizing your home backup battery system involves checking the battery bank's rated output voltage. This figure is critical because it serves as one of the foundational parameters when calculating the capacity of your system in amp-hours (Ah). Typically, home backup systems use a 12V, 24V, or 48V configuration.

Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.
