

Shenzhen-listed Chinese solar cell manufacturer Hainan Drinda New Energy Technology said it has signed an agreement with the Oman Investment Authority (OIA) to build a 10 GW cell manufacturing...

Oman seeks to instal 40mn solar panels and import close to 6,000 wind turbines over the next few years to more than double the country's existing power capacity as part of plans to produce more than 1mn mt/year of ...

The planned 10-gigawatt (GW) solar plant is a significant step towards meeting the growing demand for solar energy in Oman and the broader Middle East region. The project will encompass 8 GW of PV module manufacturing capacity and 2 GW of PV cell production, catering to both TOPCon and HJT technologies.

Senior Solar PV Engineer vacancy in Dubai, UAE with PowerChina Jiangxi Electric Power Construction. Explore more Senior Solar PV Engineer jobs in Dubai, UAE and other Middle ...

In a significant step towards Oman's ambition to localise hardware production for its massive green hydrogen initiatives, Chinese solar photovoltaic manufacturer Hainan Drinda New Energy Technology has signed ...

In an early boost for Oman's drive to localize the production of hardware for its giga-scale green hydrogen projects, Chinese solar photovoltaic manufacturer Hainan Drinda New Energy Technology has announced the signing of a provisional agreement with Oman Investment Authority (OIA) for the establishment of a first-ever photovoltaic cell ...

An Omani investor has partnered with a Chinese tech firm to establish a major Solar Photovoltaic (PV) cell and module production plant at Sohar Freezone, aiming to tap into the solar PV market in Oman and the wider Middle East.

Drinda, the parent company of JTPV, has officially initiated the establishment of a 10GW high-efficiency N-type solar cell manufacturing facility in Oman. This milestone project is scheduled to be executed in two phases, with the initial 5GW phase now underway.

The mega-scale project, estimated to cost around \$700 million, will support the production of 5 gigawatts (GW) of high-efficiency solar panels per annum. The announcement was made by Jietai New Energy Technology Co, Ltd (Jietai Solar/JTPV), a wholly-owned subsidiary of Hainan Drinda New Energy Technology Co, in a post on Friday.

In a significant step towards Oman's ambition to localise hardware production for its massive green hydrogen initiatives, Chinese solar photovoltaic manufacturer Hainan Drinda New Energy Technology has signed a

provisional agreement with Oman Investment Authority to establish the country's first photovoltaic cell production facility..

In a post on Monday, Q-SUN - a leading Chinese solar PV tech company, announced the signing of an agreement with Muscat-based Bakar Investment - a budding player in Oman's renewable energy sector - for the joint development of a 10-gigawatt (GW) capacity solar module factory in the country.

China's Drinda is set to launch its first overseas solar PV facility in Oman. Through its subsidiary JTPV, Drinda will invest \$700 million to build a 10 GW factory dedicated to TOPCon solar cell production. The project, to be constructed in two phases of 5 GW each, is part of an investment agreement with the Oman Investment Authority (OIA).

Oman seeks to instal 40mn solar panels and import close to 6,000 wind turbines over the next few years to more than double the country's existing power capacity as part of plans to produce more than 1mn mt/year of green hydrogen by 2030.
