

What is Orcan energy doing with Alfa Laval?

Orcan Energy has entered into a cooperation with international industry giant Alfa Laval to market its new marine heat recovery solution. As part of its comprehensive portfolio of marine equipment, Alfa Laval will under license market and service Orcan's new ORC solutions using its own E-PowerPack name.

What does Orcan energy do?

Orcan Energy offers products, components, and turn key solutions to convert waste heat into CO2-free electrical power for the Industry, Marine, Automotive, Power Generation, and the Biogas market.

Where can I find information about Orcan energy?

This information is available in the PitchBook Platform. To explore Orcan Energy's full profile, request access. Information on valuation, funding, acquisitions, investors, and executives for Orcan Energy. Use the PitchBook Platform to explore the full profile.

Who is Orcan Energy AG?

Orcan Energy AG develops, produces, distributes and finances energy modules for the conversion of waste heat into clean and cheap electricity and constructs them on a turnkey basis, including the installation required for waste heat extraction.

Who are Orcan Energy's managing directors?

The three managing directors Hinrich Krey, Christian P&#228;told and, new to the company, Jens Damian, are taking on the growing global demand for waste heat recovery solutions. Read more ... Orcan Energy expands its Kiel site and extends management team

How does Orcan energy expand its production capacity?

Orcan Energy expands production capacities by setting up its own production unit in Kiel. Our second-generation ORC solutions take waste heat from various processes and applications and turn it into clean electricity.

From industry to geothermal energy: Orcan Energy has implemented the first large-scale geothermal project in Kirchweidach. Six efficiency PACKs convert the excess heat from the geothermal plant into electricity in a highly effective manner, saving 4,000 tons of ...

The latest partnership is a collaboration with Orcan Energy. Founded in 2008, the leading clean technology company Orcan Energy develops and manufactures ORC solutions for the direct conversion of waste heat ...

Orcan Energy unlocks the energy potential of unused heat sources based on second-generation Organic Rankine Cycle (ORC) technology. By massively downsizing the established technology and developing a

modular solution, Orcan Energy is turning small and medium-sized waste heat sources, as well as lower temperatures into economically viable ...

Alfa Laval and Orcan Energy have signed a cooperation agreement regarding sales of marine energy efficiency solutions based on Orcan's Organic Rankine Cycle (ORC) technology. Decarbonizing the marine ...

Orcan Energy, a waste heat recovery tech company developing orc platform technology to produce mechanical energy and electricity. Here you'll find information about their funding, investors and team.

Alfa Laval and Orcan Energy have signed a cooperation agreement regarding sales of marine energy efficiency solutions based on Orcan's Organic Rankine Cycle (ORC) technology. Decarbonizing the marine industry by 2050 will demand not only new fuels, but also new technologies and a new approach to meeting energy needs on board.

Orcan Energy unlocks the energy potential of unused heat sources based on second-generation Organic Rankine Cycle (ORC) technology. By massively downsizing the established technology and developing a ...
