

Are Chinese solar panels a solution to Pakistan's rising electricity prices?

Pakistan's skyrocketing electricity prices have pushed cash-strapped households and businesses to find relief from rising costs and rolling blackouts by using low-cost Chinese solar panels.

Will China's solar influx spark a new crisis in Islamabad?

Amid soaring electricity prices, Pakistanis are switching to affordable Chinese solar panels to power their homes, small businesses, and factories. But the solar influx is leaving Islamabad with a lingering budget hole that could spark a new crisis.

Why did Pakistan end net metering?

In 2017, Pakistan started a system for "net metering" where people can sell excess electricity produced by their solar panels back to the national grid. But in March, the government indicated it wanted to end the net-metering policy to meet IMF criteria for state spending as it tries to stabilize its economy.
