

Fox ESS is a global leader in the development of inverter and energy storage solutions. Engineered by some of the world's leading inverter and battery experts, their products are breaking new ground; offering customers the most advanced product features currently available, coupled with unrivalled performance and reliability.

The Renusol East-West facing mounting system for framed PV panels offers an exceptionally high level of coverage on flat roofs. The layout also spreads the peak generation more evenly throughout the day providing higher power in the morning and ...

SolaX inverters are unrivalled in the industry for their quality, reliability and efficiency. The SolaX single phase inverters boast a wide MPPT voltage range to allow for more energy harvesting and have a maximum input voltage of 580V, with a maximum efficiency of 97.6%.

What does this mean for Midsummer customers? The VAT is on the cost of the installation of these items . Installers will continue to pay 20% VAT on goods purchased from Midsummer and only charge the end customer 0% VAT, then reclaim it in their VAT return - just as they did before with the difference between the previous 5% rate and the 20% VAT ...

Midsummer is a solar pv wholesaler who sells the full range of panels, inverters, mounting equipment and electrical components. They've also developed easy-pv .uk for designing solar pv arrays and helping installers to meet their regulatory requirements.

Solar wholesale Midsummer is trading at a level that is three times its sales volumes from a year ago, as demand for solar continues to be strong. Amid the high power prices in Britain, the need to transition to secure and green domestic renewable generation has been given further impetus.

Midsummer is one of the UK's leading wholesale distributors of renewable energy systems; solar PV, battery storage, EV charging, off-grid systems and renewable heat products. Voted the UK's BEST renewables distributor in 2020 and 2022, and listed in Cambridgeshire's top 100 privately-owned companies in 2023.

SolarEdge Power Optimisers and inverters are a great way to get the most out of shaded or complicated arrays. Optimisers track and modulate the performance of each module in order to overcome any differences resulting from shading, orientation or module mismatch.

GSE brings expert European design and production capabilities to create systems that make solar arrays possible on any building. As a cost-effective system that replaces traditional tiles or slates, GSE represents a very attractive solution for integrating solar into any rooftop.
