Edit: To add to this there is no claim from Panasonic that the disc drive (motor, assembly or laser) in the UB9000 is better than the UB820 in any way. The way they've made it quieter is due to the steel plate construction to reduce vibration. ... Also do you happen to know if your model of 9000 uses the ESS chip, or the AK chip used in the ...

The efforts to mitigate these problems has spawned an entirely new EV-specific field and given birth to Panasonic Electronic Sound Synthesis (ESS). Working with our OEM EV partners, we employ sensor fusion technology deployed in on-board systems that synthesize a variety of sounds that provide drivers with audible feedback in response to ...

Panasonic has not yet announced costs for the EverVolt 2.0, but an installation of the original EverVolt generally ranges from \$15,000 to \$20,000 depending on if you choose the Standard or Plus model. If you want to install the EverVolt or EverVolt 2.0 as part of a solar-plus-storage system, battery costs are just one part of the equation. ...
