

How much do solar panels cost in Georgia?

As of October 2024, the average solar panel system costs \$2.63/W including installation in Georgia. For a 5 kW installation, this comes out to about \$13,173 before incentives, though prices range from \$11,197 to \$15,149. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a 5 kW solar system cost in Georgia?

While a 5 kW system will only cost you \$13,173 in Georgia, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Georgia?

Are solar panels a good investment in Georgia?

Solar power is blooming in the Peach State. Georgians use more energy every month than most Americans, which means installing solar panels in the area is more beneficial from a financial perspective than in most states. However, the high solar panel cost in Georgia can be a deterrent for many homeowners.

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

Are solar panels tax deductible in Georgia?

Georgia does not offer state incentives for solar panels, but you can take advantage of the area's abundant sunshine. However, you can claim the 30% federal solar tax credit, which also applies to home battery systems. The U.S. Energy Information Administration gathers electricity price data for all states.

As of 2024, the average cost of solar panels in Georgia is \$3.06 per watt, making a typical 7.2 kilowatt (kW) solar system \$3.06 after claiming the 30% federal solar tax credit now available. This is just about the average price of residential solar power systems across the United States, which is currently \$3.03 per watt.

The average price for a home solar panel system in Georgia is \$17,880 for a 6kW system, or about per watt, slightly higher than the U.S. average of \$18,771 and \$3.13 per watt. Despite this cost being above the national

average, Georgia still ranks 7th in the U.S. for solar, reflecting a robust market with great incentives.

The average cost of installing a solar panel system in Georgia is around \$36,190 before any incentives or \$25,333 after the federal investment tax credit (ITC). These averages are based on the per-watt average cost of solar panels in the state of \$3.29 and the standard system size needed in the area to offset electricity consumption -- around ...

As of December 2024, the average solar panel system costs \$2.61/W including installation in Georgia. For a 5 kW installation, this comes out to about \$13,062 before incentives, though prices range from \$11,103 to \$15,021 .

6 ???· The average Georgia homeowner needs a 11.91 kW solar panel system to cover their electricity needs, which comes out to \$31,515 before incentives. Prices range from \$26,788 to \$36,242, but after the federal tax credit, that drops by 30%.

The cost per watt for solar panels in Georgia during December of 2024 averages \$3.52/W. A 5 kW solar panel system will cost you around \$12,320 in Georgia after the federal tax credit is applied.

The average cost of installing a solar panel system in Georgia is around \$36,190 before any incentives or \$25,333 after the federal investment tax credit (ITC). These averages are based on the per-watt average cost of ...
